BERENDS

GM40

Heavy Linkage Offset Disc Cultivator

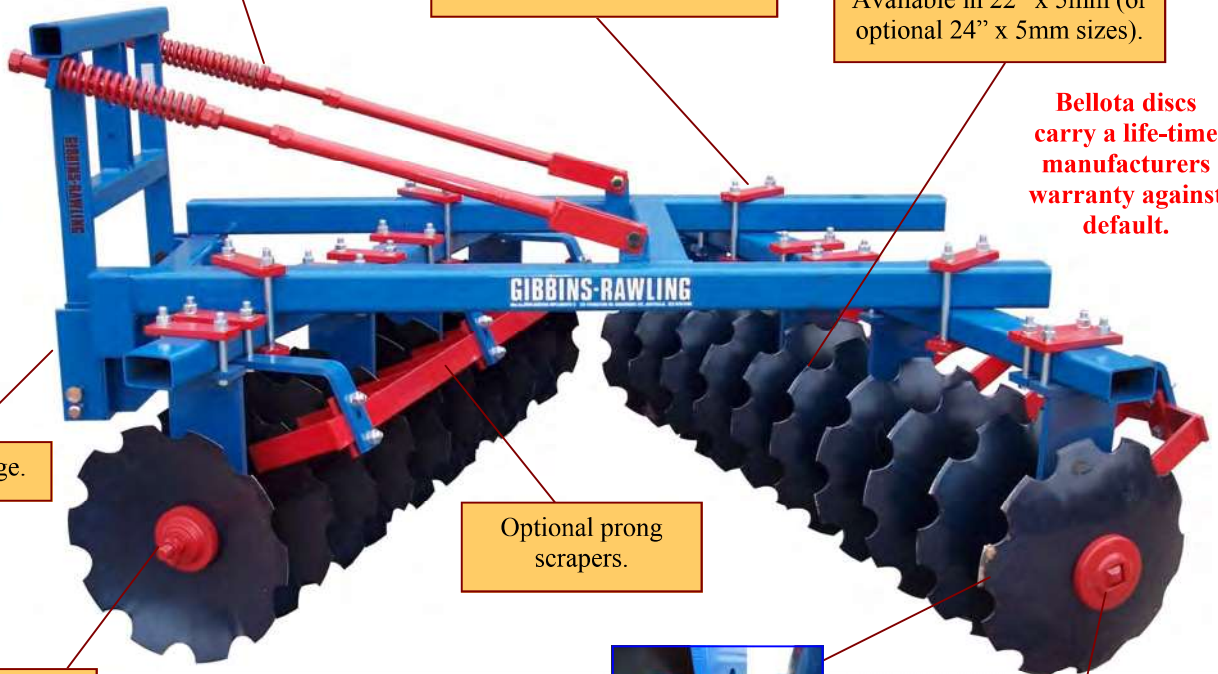

Designed for extremely tough conditions and is one of the strongest linkage disc ploughs available. Heavy weighted gangs provide excellent digging ability.

Twin spring loaded pressure screws prevent damage in rocky or undulating conditions.

Easy gang angle adjustment

Fitted with hard wearing European Bellota Boron discs at 9" spacing. Available in 22" x 5mm (or optional 24" x 5mm sizes).

Bellota discs carry a life-time manufacturers warranty against default.

Cat 1 & 2 Linkage.

Optional prong scrapers.

28mm square high tensile axles.

Greaseable flanged disc bearings with excellent sealing to exclude contaminants.

Solid cast spools, individually machined, provide all the weight in the gangs rather than in the frame (which can add load to the bearings).

*12 month warranty on design and manufacture.
