

**Made in  
Australia**

# BERENDS Deep Ripper

The Berends Deep Ripper is ideal for breaking into hard ground and cracking open the hard pan.

This aids water absorption and increases plant growth. Its parabolic curved tines allow for easy penetration into even the toughest soils. Australian made for Australian conditions.

- Cat 2 Frame made from 150 x 150 x 9mm RHS
- Parabolic tines made from 150mm x 32mm semi high tensile steel and are adjustable along the frame.
- Approximately 25-30 HP per tine required.
- The replaceable points are hardened and similar to those fitted to the buckets on industrial loaders.
- Shearbolt protection.
- Maximum working depth of 650mm.
- 1, 2 and 3 tine machines are standard configurations. Other models such as 5 tine model pictured above available on request.
- 12 month warranty against faulty materials or workmanship.
