

BERENDS

STUMP JUMP CHISEL PLOUGH

The stump jump chisel plough is ideal for primary cultivation. The spring action of the tines and the chisel points have been proven to penetrate where many other machines find conditions too hard.

- Available in 5, 7, 9 and 11 tine sizes with tines at 12" adjustable spacings.
- Horsepower requirement is approximately 8-10 HP per tine.
- Excellent underframe trash clearance of 520mm.
- Adjustable spring is designed to give a longer, more progressive action, actually chiselling as the machine moves through the ground.
