Mini Mobile Augers

Grainline introduced the Mini Mobile auger to fulfill the requests for a small petrol drive pencil auger. Unlike electric drive augers, a petrol drive auger requires the engine to be mounted at a suitable angle and in a position at the lower end of the auger where an operator can safely start and control the engine from the ground.

Grainline produce the Mini Mobile augers range complete with the undercarriage, winch kit and high speed road wheels.

The Grainline Mini Mobile auger is an entirely self-sufficient, user friendly auger offering great value and is a must for any farmer or grazier working with grain.
