# BERENDS EXTRA HEAVY DUTY SLASHER

*The EHD slasher has an extra strong build and exceptionally strong perimeter with centre cross-members where it counts. The EHD has a horsepower requirement of 60-130 HP.*

## FEATURES & BENEFITS

- Extra strong build 6mm top plate with exceptionally strong perimeter and centre tubular cross-members - where it counts.
- **Adjustable skids.**
- Two-pack paint finish.
- Headstock made from heavy angle and RHS and fitted with floating (toggle) top link.
- Bondioli & Pavesi (Italian) Series 8 PTO drive-shaft with integrated 4 plate slip clutch protects slasher and tractor. An integrated clutch means less wear between the clutch and PTO shaft.
- Hardened and tempered spring steel rotor blade assembly.
- **Front and rear chain kits** are standard with easy to replace chain pieces.
- 110 HP oil lubricated Italian Comer gearbox with 1:1.5 ratio and excellent seal protection with **5 Year Manufacturer's Warranty.**
- Straight reversible 100 x 12mm Boron slasher blades are standard with stepped configuration as an option. All bushes are through hardened. Made in Australia, the blades are hardened and tempered in the 40-45 Rockwell range. This range gives excellent hardness while delivering strength and fatigue resistance. Any harder and they potentially become brittle.

## OPTIONAL

- Chain stays.
- Bolt head protection for easy changeover of blades.
- Dual puncture proof solid rubber wheel kits for easy depth control.
