

Tall-chamber straw choppers

50 to 140 hp – woody material up to a Ø 6 cm

MULCHER

QUALITY RESIDUE MANAGEMENT

Three tall-chamber mulcher models, invincible in any conditions, make up this range that can be coupled with tractors with horsepower in the 50 to 140 range.

CHIARA and TORNADO have been designed with a tall mulching chamber and large diameter rotor for even, quality shredding and excellent discharging of the resulting mulch. This equipment, with high speed and hourly work rates, is used for brush, grass, straw and crop residue management, suitable for maize, cotton, rape, sunflowers and sugar cane.

CHIARA and TORNADO, which are rear-mounted implements, have manual or hydraulic side offset adjustment. CHIARA also comes in a fixed or offset version.

HEIGHT THAT COUNTS

The tall mulching chamber means the implement can handle a substantial flow of material - even at considerable forward speeds - without detriment to shredding quality. More specifically, CHIARA and TORNADO feature heights of 670 and 720 mm respectively.

IMPECCABLE SHREDDING

CHIARA has a 168mm Ø rotor measuring 10 mm thick and 4 toothed drive belts. TORNADO, has a 194mm Ø rotor measuring 10 mm thick and 5 toothed drive belts.

THE TORNADO & CHIARA

TORNADO is a professional machine intended for medium to large companies and sub-contractors.

The CHIARA model is intended for medium to large farms and contractors. The robustness of the structure makes this machine mainly suitable for the shredding of cornstalks and extensive crop residue.
