

# STONEFORK

## 13 TINE STONEFORK

Proudly Australian Made

The DELMADE Stonefork is a multi-use implement used for rock clearing and carting, silage and hay, land clearing, and in fact, lifting and carting anything too heavy, loose, or awkward for a normal carry-all or 2-tine fork. Normally a 3PL tractor mount is standard, but front end loader lugs are an optional addition. The standard model is fitted with 13 Conus II HD tines, but also available in a 15-tine model with smaller gaps between tines, useful when scooping smaller rocks.

The DELMADE Stone Fork is designed to complement a Rotary Stone Rake, where it is used to scoop rocks that have been raked into windrows, but it can also be effectively used in initial land clearing projects, the tines and frame being strong enough to actually loosen and dig out embedded rocks, roots and rubble, or to use like a rake to scrape up scattered stones. As a front end loader implement it is even more versatile, having the ability to lift large quantities of rocks or debris high enough to deposit into a truck or trailer for easy removal.

### OPTIONS

- Front end loader lugs (with extra headshock bar)
- Headstock mesh
- Hydraulic grab

TINES	PRODUCT CODE	WEIGHT (KG)	TINE WIDTH	CAPACITY	TRACTOR MOUNTING
13	DHE 0295	260kg	1750	1000kg	3PL Category 2
15	DHE 0296	280kg	1750	1000kg	3PL Category 2
