## **ABOUT US...**

Tas Powder Coating is a branded service of Delmade. Offering a complete finishing solution for ferrous metals.

Boasting one of the largest ovens in Tasmania we pride ourselves on offering the complete solution.

Including pick-up and delivery, abrasive blasting, zinc powder priming and quality top coating.

## **WHAT WE DO...**

Tas Powder Coating specialises in abrasive blasting, zinc powder priming and powder coating for ferrous metals.

We are committed to maintaining high standards throughout our processes to ensure you will receive a durable and long lasting finish every time.

## **FREIGHT...**

We are proud to offer a pickup and delivery service throughout Northern Tasmania. With a fleet of vehicles available to transport your product.

## **PRODUCT...**

Our oven can handle product within the following dimensions:

- 7.0m Long

- 3.3m Wide

- 2.6m High

Safety is our priority. Generally, product is handled by a 2.5 tonne fork. However, heavy products can also be handled.

Speak to our staff for more information.

## **FACILITY...**

Tas Powder Coating boasts a purpose built premium facility.

Housed in a large shed adjacent to Delmade the facility features a Blasting room, two state of the art Powder rooms and a Powder Coating oven.

# ABRASIVE BLASTING...

Removes surface rust and contamination. Providing a clean substrate surface for the primer and then topcoat. Blast room is 5m wide x 5m high and 12m long.

# ZINC POWDER PRIMING...

Protects the metal by improving the corrosion resistance.

# POWDER COATING...

Powder coating is a durable and long lasting finish for ferrous metal products. Powder is typically applied electrostatically and then cured under heat. Powder coating results in a dense finish which can be more durable than conventional painting.

# COLOUR...

Tas Powder Coating is proud to offer a huge range of colours as available from Dulux Powder Coating.

Talk to our staff for available swatch cards.

# POPULAR ITEMS...

Popular Items we can finish include:

Agricultural Equipment

Ute Trays

Trailers

Fencing Components, Fences, Posts

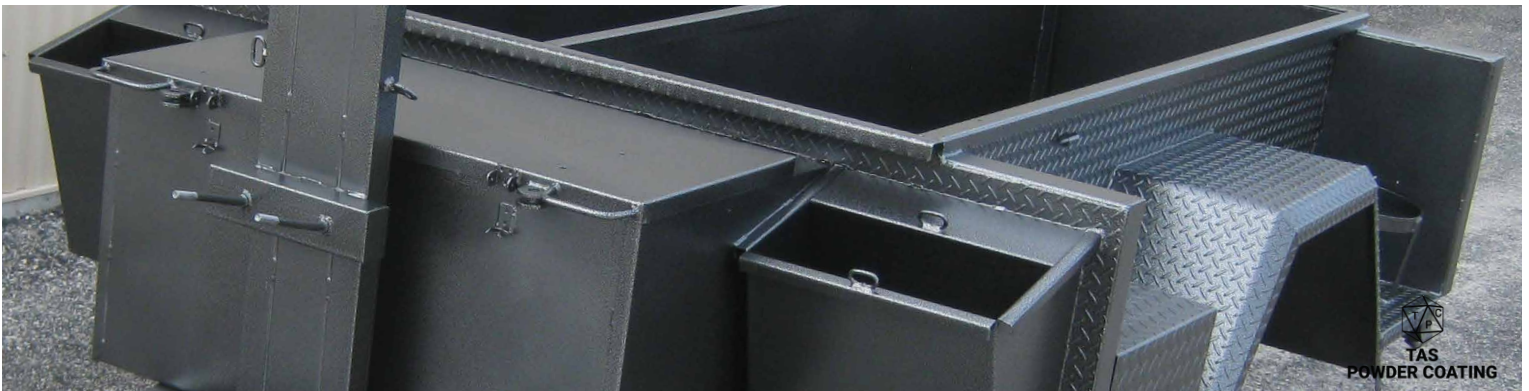

House Components, Veranda Posts

Product Stands

Hand Railings

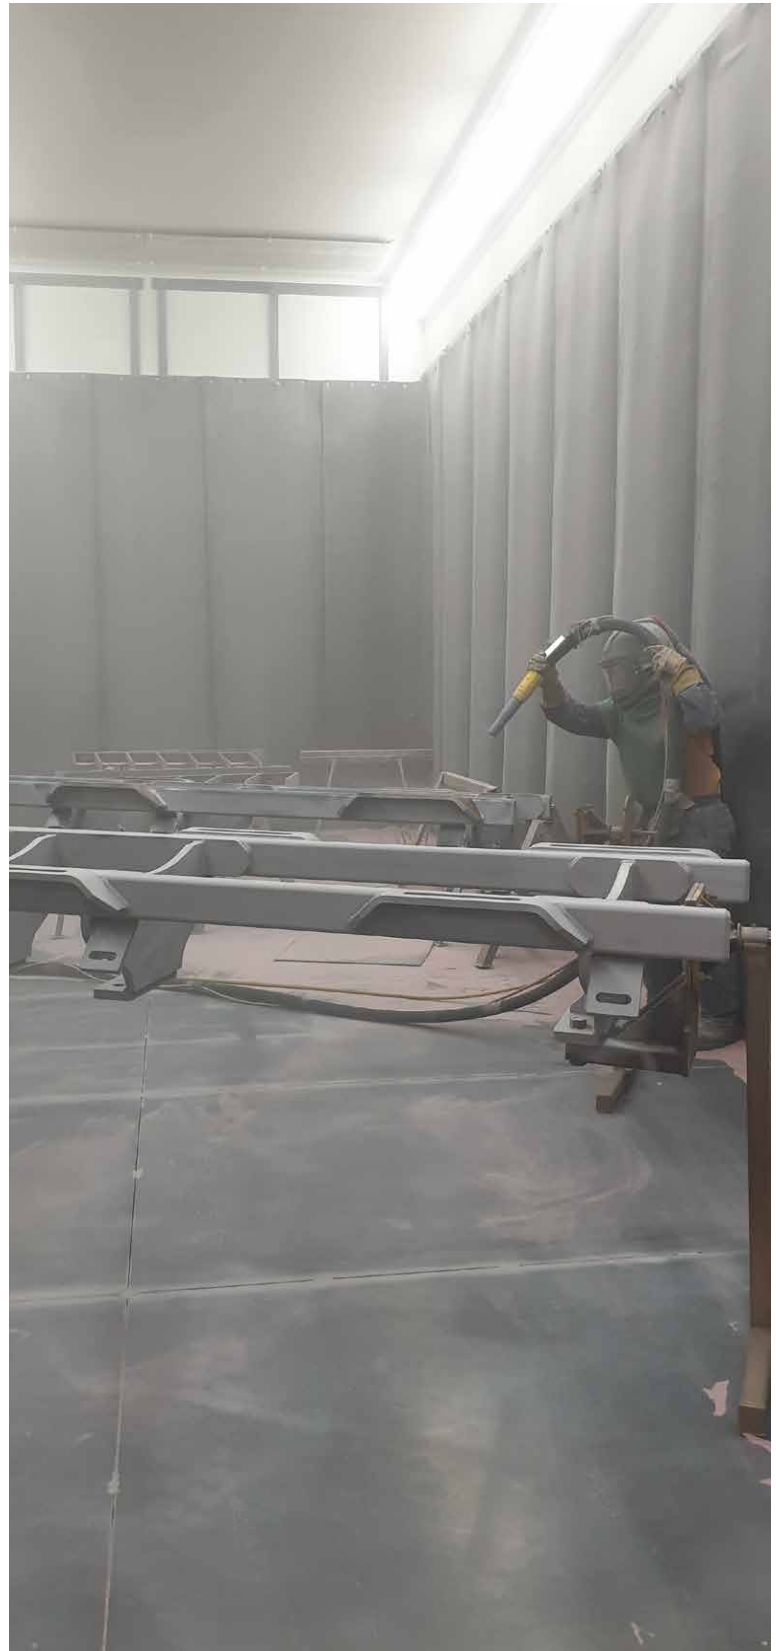

# **STATE OF THE ART BLASTING FACILITY...**

Tas Powder Coatings Blasting Facility is a state of the art stand alone facility 5m wide x 5m high and 12m long.

Having our own blasting room in-house means we have control over the entire production process and we can consistently provide a quality finish.

Our Blasting Facility is also environmentally friendly with a garnet recycling machine which lowers emissions.

# POWDER COATING BENEFITS...

Powder Coating widely renowned for its durability and hardness. A correctly applied powder coat with a premium zinc protection under coat is ideal for protecting equipment in Australia's harsh outdoor environment.

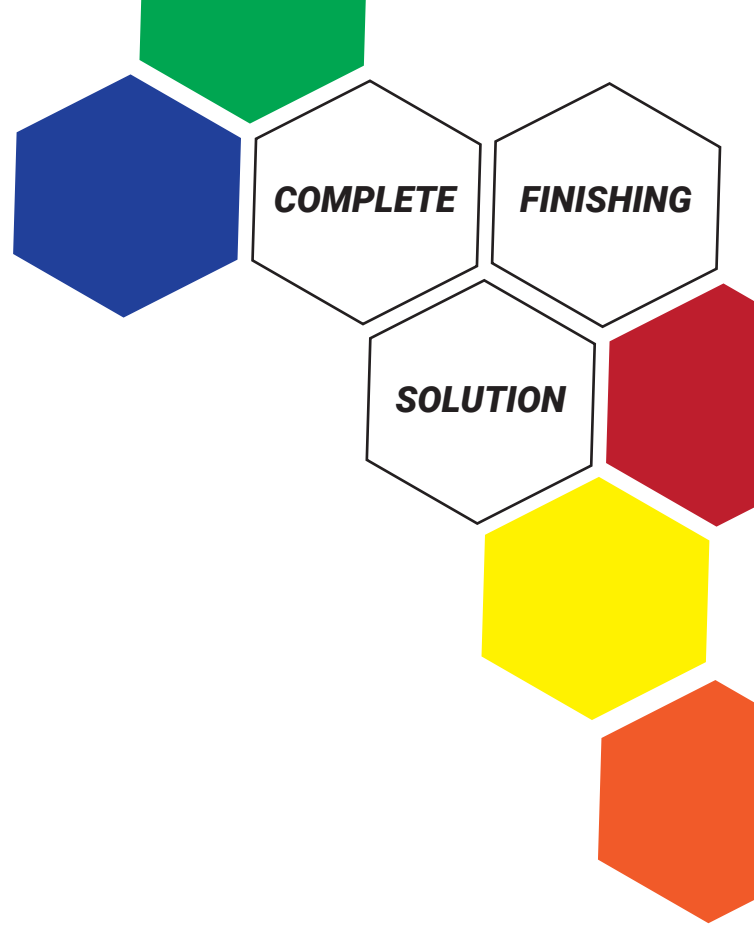

Powder Coating is also far less environmentally impacting than other finishing solutions. At Tas Powder Coating all our finishing processes are completed in an indoor sealed environment. This means there is virtually no risk of air pollution.

So if you're after a finish that will last the distance at little risk to the environment Powder Coating is definitely the preferred solution.
